## InfiniGen Marine Platinum System SETAS (Stealth, Energy, Tactical, Advantage System)

### Military or Recreational Use

- 6 kWh Lithium Battery Pack
- 400 total Lithium Ah (amp hours) = 600 Lead Acid Ah (amp hours)
- Weighs approximately 130 pounds
- Ability to run ~50 amps per hour for approx. 10+ hours (cycled)
- Longevity is 3000+ cycles to 90% DOD without harm to batteries (life cycles)
- Built-in internal battery monitoring system (BMS) with automatic safety shutdown (series of safety redundancies)
- Battery monitoring system display standard
- Automatic internal thermal controlled environment
- Completely recyclable
- Eco-friendly, eco-compliant, eco-green-oriented
- Zero emissions
- 115 volts or 230 volts Shore Power standard
- Superior recharging recovery time (end-of-day plug-in to charge fresh set of batteries ~2 hours)

# InfiniGen

TM

Powered By Enertek Solutions, Inc.

- Operating temperatures -30° C to +60° C (optimal +10° C to +40° C)
- Configurable in 12 volt, 24 volt, 36 volt or 48 volt DC up to 1000 volts DC
- Series or Parallel Power 3 Kwh increments (3, 6, 9, 12, 18, 24 to 1 megawatt perfect for wind or solar)
- Can withstand up to 10c discharge of battery for longer periods
- Programmable inverter/charger
- Easy plug 'n' play
- Marine and Military wiring connectors
- Can be configured in conjunction with a Gen-set or standalone
- Dimensions: 10" h x 21" w x 30" l
- 3-year warranty
- Extended battery service warranty available
- Customizable and user friendly
- Zero maintenance (sealed system)
- High power or high energy/density
